

Information Sheet - MS Topfoam

MS Topfoam is a powerful alkaline soaking fluid with unique adhesive properties for removal of typical soiling in animal housing (slurry, animal and vegetable fats and food rests).

Especially developed to overcome the disadvantages of gel cleaning (= static cleaning, poor rinsing ability and high water usage) and to combine the advantages of foam cleaning (= dynamic soaking, quick to rinse, concentrated) Economical in use and especially effective on heavy soiling because of the longer and better adhesion. Labour and water savings, suitable for cleaning of animal housing and livestock transport vehicle crates. Use MS Truck & Car Wash for painted surfaces. MS Topfoam is more effective than Gel cleaning and hot water blasting.

Uses concentration: 1-2% (1-2 liters MS Topfoam per 100 liters of water)

Contains: sodium hydroxide

MS TOPFOAM

Let the foam work for you!

(Available in 22kg drums)
